## SHOCK-WBV

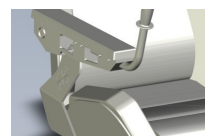

SHOCK WBV has partnered with marine sales leader Loki Dynamics to accelerate growth in shock mitigation technology. As part of the alliance, **Loki Dynamics' Managing Director, Andrew Hughes**, becomes Business Development Director at WBV, and Loki is appointed global sales agent for all WBV products. This collaboration merges WBV's engineering expertise with Loki's sales and market insight, enabling expanded reach, new product lines, and fully integrated solutions for marine and land-based transport. Together, they aim to deliver cutting-edge, cost-effective shock mitigation systems that prioritize safety, comfort, and performance across sectors.

## KONRAD Marine

Loki Dynamics is proud to partner with Konrad Marine to offer hybrid-compatible stern drives that support both diesel and electric motors, enabling efficient, seamless, and sustainable marine propulsion. Engineered for heavy-duty commercial, military, and recreational use, Konrad drives deliver exceptional control, torque, and performance. Built to meet the rigorous demands of military operations, they exceed standards for reliability and durability. Combining the benefits of inboard diesel—fuel efficiency, extended engine life, lower maintenance, and cleaner operation—with the precision of trim-capable stern drives, Konrad provides a powerful, safe, and efficient solution for modern marine applications.

## The LOKI Marine Seat

SHOCK WBV has formed a strategic partnership with Loki Dynamics, appointing them as the global sales agent for all WBV products. Andrew Hughes, Managing Director of Loki Dynamics, will also serve as WBV's Business Development Director. This collaboration combines WBV's engineering expertise in shock mitigation with Loki's sales and market insight to expand product offerings and deliver integrated solutions for marine and land-based applications. Together, they aim to drive innovation, improve safety and performance, and meet evolving customer needs across commercial, military, and recreational sectors—strengthening WBV's global presence in the shock mitigation market.

## SPIIND Maritime & Defence

Loki Dynamics is introducing the SPIIND 'Sea Calm' VR headset range from New Zealand to the UK, aiming to transform maritime health by tackling seasickness without medication. Unlike typical VR devices, these headsets create a calming, immersive experience that avoids motion sickness. Developed by SPIIND Maritime & Defence, the range includes Sea Lite, Sea Calm, and Sea Pro—designed for entry-level, commercial, and defence users, respectively. Packaged in IP67-rated waterproof cases, the headsets offer rapid relief within 7–12 minutes, enhancing well-being, reducing costs, and improving staff retention. Loki will showcase the technology at Seawork 2025.
